LIVE!

The Geographic Society of Chicago

Saturday Workshop: **People in Many Places**, Saturday, January 23, 2010; 9:30am-3:30pm

From theories on evolution to the impact that global warming has had on our planet, explore the ways in which humankind has adapted to as well as contributed to the changes in our past and present environments. Explore Field Museum collections and exhibitions as well as participate in lesson ideas.

NEVADAWIER

TUES, FEB 2, 2010 . 7:30 PM

AFRICA THROUGH THE LENS

MICHAEL DAVIE
FILMMAKER / JOURNALIST

Enriching his presentation with tales of adventure, extraordinary personal encounters, and riveting film clips, Davie will appeal to all those wanting to understand Africa today and its role in our future.

FRANCIS LATREILLE

TUES, MAR 9, 2010 . 7:30 PM

WAKING THE BABY MAMMOTH

DANIEL FISHER
PALEONTOLOGIST

In May 2007, an incredible discovery was made in Siberia: the almost perfectly preserved body of a baby mammoth, later named Lyuba, which had been protected by permafrost for some 40,000 years since its untimely death. Fisher will tell Lyuba's story, explaining what this treasured ambassador can teach us about the life and times of mammoths.

SVAVAR JONATONSSON

TUES, APR 13, 2010 . 7:30 PM

THE BIG THAW

JAMES BALOG
PHOTOGRAPHER / GEOLOGIST

Presenting dramatic and awe-inspiring images of our planet in flux, Balog delivers an eloquent and empowering testimony to the reality of climate change, Inspiring his audience to make a difference.
